

Installation Instructions

Wood Burning – Square 50" x 50"

1. For the first layer, place the block as shown in the pictured pattern.

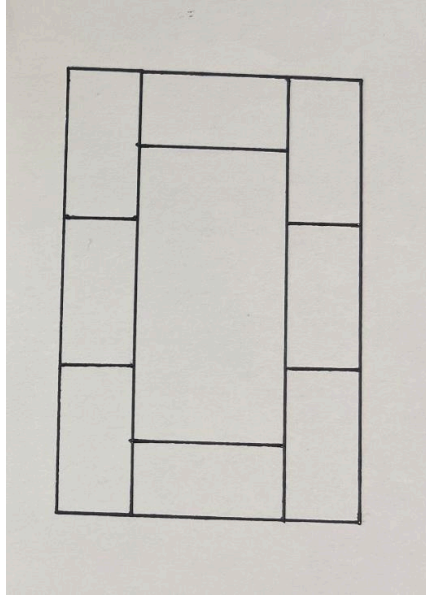

2. Offset each additional layer by placing the center of a block directly over the seam of the layer below.
3. Place the block caps on the top layer so there is a 1 ½" gap around all outside edges.

4. If desired, glue the caps in place with a heavy-duty exterior block adhesive (sold separately).

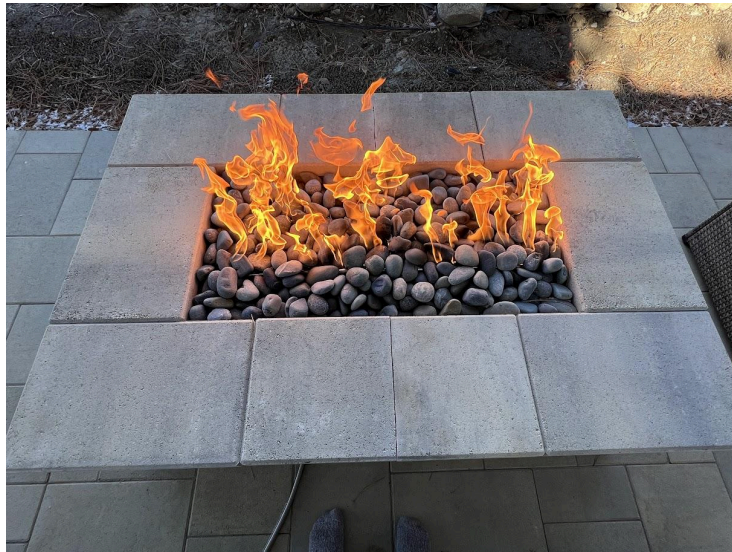

Wood Burning – Rectangle 60" x 40"

1. For the first layer, place the block as shown in the pictured pattern.

2. Offset each additional layer by placing the center of a block directly over the seam of the layer below.

3. Place the block caps so there is approximately a 3" gap all the way around. You will have 4 caps that are cut to a shorter width. Each long side of the fire pit will have 2 of these shorter caps placed next to each other in the center.

4. If desired, glue the caps in place with a heavy-duty exterior block adhesive (sold separately).
